HELP NEEDED

The Philadelphia Fire Department is looking for sample locks to use for educational purposes at the Fire Department Academy. Any **used** lock of different styles is what's needed. Locks on mounts would be most appreciated but not necessary. I asking GPLA members to bring any: Rim locks (jimmy proofs, dead bolts and night latches)

Tubular (key in knob, levers, single/double deadbolts) Panic hardware (crash bars, slim line, vert. rod) Store front (latches, telescopic, swing bolts) Mortise locks (lever or knob different functions).

The purpose of their class is to help fire fighters recognize what they are up against from the outside of a door. Not an easy feat.Thanks in advance.
